

13th ANNUAL CONFERENCE PROCEEDINGS

7-9 JULY 1998 – Orange NSW

“PASTURES TO PROFIT – THE BUSINESS OF FARMING”

Invited Papers	Author	Page
Processing and Farming – do they work together?	Peter MacSmith	3
Challenge to Traditional Thinking	Alec Thompson	10
Pasture Improvement – Expensive Indulgence or economic necessity	Cyril Wills	14
Management and Marketing Strategies for Profitable Grazing	Robert Stanbridge	18
What Should We Use From The New Zealand Pastoral Industry	Rob Eccles	21
Effects of fertiliser and grazing management on pastures, animal productivity and profitability	Geoffrey Saul	27
Producing low cost milk from pastures	Andrew Bruem	33
Can the soil phosphorus bank be unlocked by plants?	Alan E Richardson	37
Farm business management	Robert Patterson	42
Perennial Pastures in the Cropping System	Neville Thompson	45
Limitations to increasing nutrient supply from forages	DP Poppi, SR McLennan	47
Genetic improvement of feed conversion in beef cattle	Jonathon Wright	52
Kareela Wool – The product at the end of the line	Mary Hall	55
Contributed papers	Author	Page
Effects of sowing depth and time on the emergence of perennial subtropical grasses	KC Motley	59
Studies on the Establishment and Early Persistence of Six Native Grasses on the Central Tablelands	R Stitt, B Baldwin, P Dowling	61
The effect on wool production of adding Super to a native pasture	Phil Graham, Martin Williams and Roger Garnsey	63
The effect of high and low rates of reactive phosphate rock or water soluble fertilisers on net returns from 2nd cross lamb production	Bruce Clements, Michael Keys, Martin Williams and Howard Sinclair	64
Phosphorus availability in natural and improved pasture under long-term grazing	Belinda Hackney, Kathy King and Donald MacLeod	66
Effect of fertiliser and pasture improvement on soil pH on Northern Tablelands NSW soils	MR Duncan, GJ Crocker	67
Effect of lime rate on lucerne persistence and productivity	CL Mullen	69
Effect of Canberra sewage ash on soil pH and cadmium levels	Peter Simpson, Mark	70

	Whatmuff	
Filling the winter feed-gap: Autumn oversowing of a kikuyu (<i>Pennisetum clandestinum</i>) dominant sward in the Sydney Metropolitan region	SM Johnston, AC Andrews	71
Persistence of Caucasian Clover (<i>Trifolium ambiguum</i>) on the Monaro	Stuart Burge, Linda Ayres, John Booth and Helen Nicol	74
Farmer Experience with Chicory on the Central Tablelands and Slopes of NSW	M Parker, DR Kemp	75
Tall fescue ecotype collection on the Northern Tablelands of NSW	CA Harris	77
Evaluation of meat production from improved tall fescue cultivars	G Milne, F Johnson and H Eisenhauer	78
Irrigated lucerne in the south – What's new?	Mary-Anne Lattimore, Sam Lolicato	80
Planning pastures for horses	WM Wheatley, JL Stallard and RA Woodward	81
Chilean needle grass (<i>Nassella neesiana</i>) management options	Jeff Lowien, Mark Gardener and Archie Cameron	84
Use of low rates of herbicides to control serrated tussock, African lovegrass and St. John's wort in NSW	MH Campbell	85
Competitive Pastures for Giant Parramatta Grass	DI Officer, TE Launder	88
A Survey of lucerne establishment in southern NSW	Eric Koetz, Mark Norton	92
Travel Grant Report		
Report on Grassland Society of NSW funded study tour to Western Australia – April 4 to 11, 1998	RD Freebairn	100
